Important Health Warning About Playing Video Games

Photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these “photosensitive epileptic seizures” while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Xbox LIVE

Play anyone and everyone, anytime, anywhere on Xbox LIVE®. Build your profile (your gamer card). Chat with your friends. Download content at Xbox LIVE Marketplace. Send and receive voice and video messages.
Get connected and join the revolution.

Connecting

Before you can use Xbox LIVE, connect your Xbox 360 console to a high-speed Internet connection and sign up to become an Xbox LIVE member. For more information about connecting, and to determine whether Xbox LIVE is available in your region, go to **www.xbox.com/live/countries**.

Family Settings

These easy and flexible tools enable parents and caregivers to decide which games young game players can access based on the content rating. For more information, go to **www.xbox.com/familysettings**.

Cabela's DANGEROUS HUNTS 2009

Setting up the Game

New Game
Start Page

After pressing START, you can choose to save your game on any attached Storage Device. You will then be brought to the Main Menu.

Load Game

Select this to load a previously saved career.

Main Menu

From the Main Menu, you can: Begin your hunting adventure by selecting **Career**, go on a variety of special hunts on **Bonus Missions**, aim for a high score in the **Action Zone**, change your gameplay preferences in **Options**, or view your progress or the credits in **Extras**.

Career

Take on the role of Flint Abrahams as he adventures across the globe to hunt the most dangerous game in existence. In each location there is a deadly animal you must hunt, but who knows what will happen along the way…

Bonus Missions

In bonus missions you will use the skills you have learned in Career mode to hunt a variety of targets in special scenarios. Follow the objectives for each hunt and use the special equipment you will be issues to bag an impressive trophy!

More bonus hunts will unlock as you progress through Career. Completing them will give you more upgrade points, allowing you to customize your firearms.

Action Zone
In this arcade-style mode you will face off against packs of vicious game in a series of timed challenges. Hunt each group of animals then run for the portal to make it to the next level, but be fast because the clock is ticking!

By fulfilling certain requirements, you can earn power-ups that will help you increase your score. Press the action button to use them.

Action Zone challenges will unlock as you progress through Career mode, and by achieving the target score on each level you will earn more upgrade points.

Options
Audio: Adjust music, sound effects, speech, and environmental audio volume levels.

Controls: Adjust control sensitivity and choose to invert the Y-Axis.

Gameplay: Set options for subtitles, Vibration, and autosave.

Cabela's DANGEROUS HUNTS 2009

GAMEPLAY

Look & Move
Use the Right Stick to look around, and the Left Stick to move your character.

Firearms
When hunting dangerous game, nothing but the biggest, baddest rifles will keep you safe. For each hunt you can select one large caliber rifle, one small caliber rifle, and a handgun. Guns can be selected from the Gear Menu or using the D-pad.

Before entering an area, you will have a chance to customize different parts of your rifles to improve their abilities. New guns will be unlocked by playing through the game, and custom parts require that you earn upgrade points to purchase them.

Hunter Sense
By using hunter sense, you will gain an acute awareness of your surroundings, and any interest points will be highlighted gold. By moving your crosshairs over any highlighted object, you will get information that could be vital to your hunt.

Adrenaline
As you find yourself in dangerous situations, you will build up a store of adrenaline that can be used when needed. It will slow down you perception of time when used, allowing for a perfect shot even against moving targets.

Melee Actions
If you miss your shot, you may find yourself up close and personal with a very angry animal. Follow the button prompts that appear on the screen to escape with your life, but be fast because you only have a short window to perform the required input.

Baiting

As many dangerous game animals are carnivorous, sometimes the carcasses of other animals can be used to draw your target. If an animal can be picked up as bait, a hand icon will appear when near it, and you can press the action button to pick it up. It will be added to your Gear Menu.

An icon will appear on your screen when you are in a good area to use the bait. Press the BACK button to go to the Gear Menu and use it. Once it is placed, be patient and your target should appear.

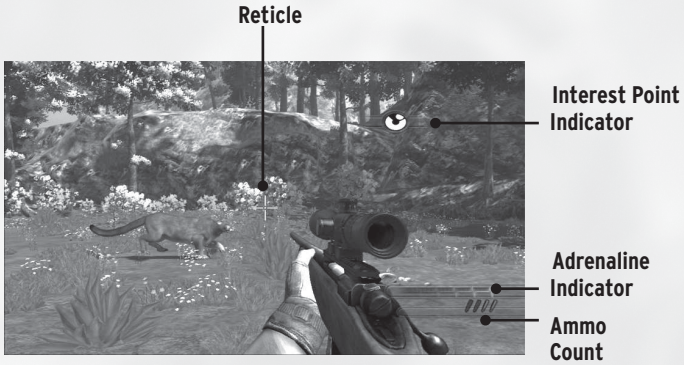
Stealth

To remain quiet when approaching animals, crouch and move slowly, and they will be less likely to see you.

Cabela's DANGEROUS HUNTS 2009

THE HUNTING SCREEN

For a successful hunt, keep track of these important onscreen indicators.



Reticule: Use these crosshairs to aim.

Ammo Count: Shows how many rounds you have left before you need to reload.

Adrenaline Indicator: When the red EKG line appears, your adrenaline is available for use.

Interest Point Indicator: If the eye is solid you have an interest point right in front of you. A transparent eye indicates an interest point in your peripheral vision.
