Important Health Warning: Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people with no history of seizures or epilepsy may have an undiagnosed condition that can cause "photosensitive epileptic seizures" while watching video games. Symptoms can include light-headedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, momentary loss of awareness, and loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects. **Immediately stop playing and consult a doctor if you experience any of these symptoms.** Parents, watch for or ask children about these symptoms— children and teenagers are more likely to experience these seizures. The risk may be reduced by being farther from the screen; using a smaller screen; playing in a well-lit room, and not playing when drowsy or fatigued. If you or any relatives have a history of seizures or epilepsy, consult a doctor before playing.

Welcome to Stoked Big Air Edition

Where do you see yourself? A religious freestyler? A dominating competitor? Think you have what it takes to stand alongside Travis Rice and rule both sides of the sport? In Stoked: Big Air Edition you'll get the opportunity to reinvent yourself. But hey, hold up a minute…don't forget about the great equaliser; all snowboarders, regardless of riding preference, individual skill set, and sponsorship, are at the mercy of the snow and weather conditions of the mountains on which they ride.

Get ready to set yourself apart as the most influential rider in the world of snowboarding through freestyle, competition, and sponsorship!

THE BLUE TOMATO CUSTOMISER

The first time you play Stoked: Big Air Edition you will be directly taken to the Blue Tomato Customizer to create your rider. There are several categories to customise. Move the left stick up or down to highlight a category and press the A button to confirm. Inside a category move the Left Stick Left or Right to cycle through the category's selections.

Rider: customise your sex, height, select your face, and home country. Your name is your Xbox 360 Gamertag.

Clothing: Customise upper and lower body clothing, pick a pair of gloves, and your boots. Dress for the weather; warm and cold weather clothing choices are available! When you first start your Stoked: Big Air Edition career you will have access to limited gear and clothing from the 2008 / 2009 season. But, as you gain influence, you'll be given a crack at earning additional sponsorships! Once sponsored your clothing and gear choices will grow… and you'll have access to all new stuff from the 2009 / 2010 riding season!

Accessories: Select headwear (hats and helmets), eye wear (sunglasses and goggles), a backpack (if desired), hairstyle and facial decoration (such as a bandana).

Board | Binding: Select your deck, your bindings, and set your riding stance. When you start a Stoked: Big Air Edition career you have access to a limited set of snowboards and bindings. As your career grows so will your gear choices; as a sponsored rider you'll earn new, unique decks and bindings!

Sound & Music: Use your in-game phone to manage your music and to set a personal Anthem (theme song).

The Stoked: Big Air Edition playlist features a wide range of musical genre choices. Move the left stick up or down to highlight a genre and left or right to turn the genre on or off. (A genre turned off will not play while you ride). Press the A button to save your changes.

The Anthem feature allows you to set a personal theme song that will play at a time when you are most deserving of an aural accolade! Move the left stick up or down to highlight a theme song and left or right to select it. (You will also be given a preview of the theme song once it is selected). Press the A button to save your changes.

To accept your customised rider, press the BACK button. You will be taken to the Main Menu. If you wish to modify your rider you can return to the Blue Tomato Customizer at any time and make gear or clothing changes.

GIGI

MAIN MENU

The Main Menu is your window into a living, breathing world. Scope out where you want to ride, and in what conditions, live, every day! What you see is what you'll be thrust into the second you make the helicopter drop.

Each day the snow and weather conditions change on each of the seven mountains in Stoked: Big Air Edition. Snow accumulates on mountain surfaces, changing the riding experience, opening new paths, and building new trickable features and challenges. Storms roll in and blanket valleys in fog. This morning you rode down the frontside of Laax, basking in the morning sun. Now, several hours later, the frontside is in shadow and what was once fluffy powder is now icy and slick. Is it sunny or is it overcast on the north face of K2 today? Is there fresh snow on Mt. Fuji, or is it rocky and tracked out? Different experiences, different riding challenges. You pick where you (and your posse on Xbox LIVE) want to ride based on the location, snow, and weather conditions that match your style.

Four icons on the right side of the screen give you a quick heads-up about the current mountain conditions. (If you are playing Stoked: Big Air Edition on Xbox LIVE all players in your game session will have the same time of day and weather conditions).

Clock: Displays the day of the week and the current time for the mountain (in-game).

Weather: Displays up to date details on the ingame weather for the mountain.

Accumulation: As storms move across the mountains, fresh snow is dumped. Check out the amount of fresh powder you can shred.

Battle of the Brands: Select Trick or Die challenges are tagged as Brand Battlegrounds. Sponsored riders compete to own these trick spots on behalf of their sponsors. Own the challenge by taking the top spot on an Xbox LIVE Leaderboard and it will be flagged as "owned" by your sponsors. Bomb the mountain with your sponsor teammates and take over the mountain. The Battle of the Brands icon shows you which brand currently "owns the mountain" on Xbox LIVE. Press the Y button to refresh the ownership icon. Leaderboards are refreshed periodically so keep riding! Your sponsor's cred is at stake!

Fight for your sponsor! Challenge icons tagged with a Red Flag represent Brand Battlegrounds that are open to be taken or currently owned by a rival sponsor. Challenge icons tagged with a Green Flag represent Brand Battlegrounds currently possessed by you or your sponsor.

MAIN MENU SELECTIONS

All menus can be navigated by moving the left stick up or down to highlight a menu item and then pressing the A button to confirm. Press the A button to advance to the next menu screen. If you would like to go back a menu screen, press the B button.

As you ride, press the X button to enter the associated challenge. Complete the objectives defined to win the challenge.

YOUR CAREER

In Stoked: Big Air Edition you'll get the opportunity to reinvent yourself. Get ready to set yourself apart as the most influential rider in the world of snowboarding through freestyle, competition, and sponsorship!

Influence
As you beat challenges you will earn Influence Points. As you build influence (and your career progresses) new mountains and new challenges will be unlocked. Sponsors will take interest in you and extend to you an initial offer for a sponsorhip. There is no right or wrong way to build influence: just ride.

Hucking VS Stylish Riding
There are two ways to ride: as a Hucker or as a Stylish Rider. Huckers are all about quantity: do as many tricks as you can, as fast as you can. Stylish Riders are all about quality: do a small set of tricks slowly and smoothly. Hucking and stylish riding both generate near equal point values. It is up to you to define your style.

As you ride and complete challenges you will earn skill bonuses. As you huck tricks you will gain pre-wind boosters that increase your spin rotation rates and allow you to pull off grabs faster.

In contrast, as you perform stylish tricks, you will unlock tweaked and boned grabs and the other moves in your trick repertoire will be smoothed. Be committed! Gains won by hucking will be undone by stylish trick performance and vice versa.

Each time you complete a trick (successfully land it) you will be judged and will receive bonuses that contribute to your style progression:

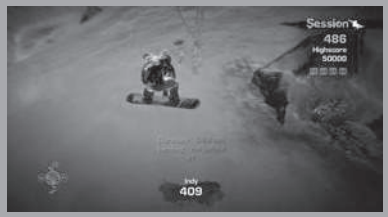
Hang time: The amount of time airborne after you ollie (jump). Applies to both jumps and rail dismounts.

Landing: The quality of your landing. The flatter your board on the snow, and the more directly it is pointed downhill when you land, the more perfectly executed the landing and the bigger bonus you'll receive.

Multiplier (potential): The potential score multiplier earned; the bigger the multiplier the bigger the boost to your score. Multipliers decay over time.

Hucked/Styled: Judgment on the trick performed. View your career statistics and current Hucker VS Stylish Rider status by pressing the Start Button to pause the game and selecting the Statistics Menu.

Scoring Points
Just because you could push a trick further doesn't mean you should. Rotate too far or try to hold that grab, slide, or butter a bit too long and all accumulated points go away should you crash. Landing on your face, your back, or sideways (perpendicular to the mountain slope) is a great way to wipe out and lose your trick points. Sketchy landings give smaller landing bonuses. Hold grabs as long as you can.



Release it right before you hit the ground to accumulate more points than if you release your grab half way through your aerial trick. If you land holding your grab you will crash and all points will be lost.

Mix it up! You earn fewer points each time you do the same trick over and over again.

Pro Tip: if you can't hold your balance while doing a grind trick then jump off the "rail" by tapping up on the right stick. You'll avoid a wipeout and save your accumulated points.

Vertical Drop

Each Session challenge (associated with a helicopter drop point) has a Vertical Limit. Vertical Limit is the distance from the drop point to the bottom of the run. If you beat the Vertical Limit of a Session challenge while riding you'll earn bonus Influence Points.

XBOX LIVE

Xbox LIVE brings more of the entertainment.

Tärkeä terveysvaroitus: Valoyliherkkyyden aiheuttamat epileptiset kohtaukset

Hyvin harvat ihmiset voivat saada epileptisen kohtauksen tietyntyyppisistä visuaalisista kokemuksista. Tällaisia kokemuksia voivat olla esimerkiksi vilkkuvat valot tai videopeleissä esiintyvät kuviot. Jopa henkilöillä, joilla ei aiemmin ole ollut kouristuskohtauksia tai epileptisiä kohtauksia, saattaa olla taipumus "valoyliherkkyyden aiheuttamiin kouristuskohtauksiin" videopelejä pelatessaan. Oireita voivat olla huimaus, näkökentän muuttuminen, silmien tai kasvojen nykiminen, käsien tai jalkojen nykiminen tai vapina, keskittymiskyvyn puute, sekavuus, tajunnan menetys tai kouristukset, jotka voivat johtaa loukkaantumiseen esimerkiksi kaatumisen tai esineisiin törmäämisen seurauksena. **Lopeta pelaaminen heti ja hakeudu lääkärin hoitoon, jos sinulla on joitakin näistä oireista.** Vanhemmat, tarkkailkaa lapsianne näiden oireiden varalta – lapsilla ja teini-ikäisillä on suurempi riski saada epileptinen kohtaus. Riskiä voi vähentää istumalla kauempana näytöstä, käyttämällä pienempää näyttöä, pelaamalla hyvin valaistussa huoneessa ja olemaan pelaamatta, kun on väsynyt tai rasittunut. Jos sinulla tai sukulaisillasi on ollut aiemmin tällaisia kohtauksia tai epilepsiaa,

Aviso Importante de Saúde: Epilepsia Fotossensível

Existe um número muito reduzido de pessoas que podem ter um ataque epiléptico ao serem expostas a determinadas imagens visuais, incluindo luzes ou padrões intermitentes que poderão aparecer em videojogos. Mesmo pessoas sem antecedentes de tais ataques ou de epilepsia poderão sofrer de doença não diagnosticada que pode provocar "ataques de epilepsia fotossensível" ao verem videojogos. Os sintomas podem incluir tonturas, alterações da visão, espasmos nos olhos ou na cara, espasmos ou tremor nos braços ou nas pernas, desorientação, confusão, perda momentânea de percepção e perda de consciência ou convulsões que podem resultar em ferimentos devido a quedas ou no embate em objectos próximos. **Para de jogar imediatamente e consulta um médico se observares algum destes sintomas.** Os pais devem observar os seus filhos ou consultá-los relativamente a estes sintomas — as crianças e os adolescentes têm maior probabilidade de sofrer esses ataques. O risco de ataques de epilepsia fotossensível pode ser reduzido, afastando-te do ecrã; utilizando um ecrã mais pequeno; jogando numa sala bem iluminada; e não jogando quando te sentires sonolento ou fatigado. Se tiveres antecedentes, ou se houver alguém na tua família com antecedentes de ataques ou epilepsia, consulta um médico antes de jogares.
