1. Hello

This is my entry for PDROMS CODING COMPETITION #3.99!

I apologize for it being a bit short, I didn't have much time to work on it...
I also ended up having to do the graphics and almost all the music myself. :[

The first boss music was made by coda, hello coda!
The final boss music was made by xaimus, hello xaimus! Thanks for making my
binary >200kb!!

By the way, if you haven't noticed, the music is in IT format! It is replayed
by my fantastic new sound engine. Find out more at www.maxmod.org! :D

BTW, For the best experience, please play this game on an actual GBA!!

2. How to Play

Use the D-Pad to steer your jet to avoid the flashy bullet thingies. :)

Press B to fire at enemies. Collect Powerups (the "P" things that fly around)
to strengthen your firepower.

Press A to launch a big missile that blows up lots of stuff. It also makes you
invulnerable for a short period. You will start with 2 of these with each life.

The "B" pickups will supply you with an extra missile.

If you touch a bullet then you will explode and lose a life! If you have no more extra lives, (shown in top-left/right corner) the game will end. You may continue from the beginning of the level (but you lose your score).

3. Multiplayer

If you have a couple GBAs lying about and a multi-player cable, you can have a second player join the game! When you link the GBAs together (during gameplay) the game will automatically be transferred to the second GBA and gameplay will resume with the second player.

The small, purple colored plug is for the host's GBA and the gray large plug is for the second player's GBA. If the second GBA has a Game Pak inserted, you must hold Start+Select (during the Nintendo logo screen) to cancel the game from starting normally.

NOTICE

Sorry, but due to time restrictions,
multiplayer gameplay is NOT implemented
in this release.
