Use your joystick to steer your vessel out of the safe haven of your base towards the oncoming alien battle fleet.

You will need all your nerve and skill to avoid the enemy's destructive firepower. But remember you command **DREADNAUGHT** - the pride of your civilisation - and you alone must beat off a determined enemy.

You will stay alive longer by moving the joystick gently either left or right. Remember the quicker you move the stick the quicker your submarine races through the water. But the oncoming attackers move fast too and you are always in danger of collision. So play it cool and use your fire button to blast the enemy.

LOADING INSTRUCTIONS:

Place tape in recorder and switch on computer whilst holding down START and OPTION keys. The game will load and run automatically.

Press start to commence play.
