ST/AMIGA
Loading:-

Insert disk into drive and switch on machine. Program will load and run.

To start game from title pages or demo mode press fire.

The objective of the game is to travel between stations avoiding the enemy. Move forwards/backwards by moving stick right/left. Change tracks by moving stick forwards/backwards. Pressing fire releases smoke with which you can shoot down enemy planes.

Also en-route you will encounter mailbags which can be picked up for bonus points and water towers which if stopped at will replenish your water supply.

Each level is more difficult to complete than the previous one with number and type of enemy forces increasing.

After completion of each level and calculation of mailbag and time bonuses there is a bonus level where you must shoot down planes to earn extra points.

After the game has finished enter your name on the highscore table by typing it from the keyboard and pressing Return.

Features:-

Enemy Trains, Tanks, Oil Wagons.
Planes, Balloons, Road Traffic.
Signals, Points.
