Important Health Warning About Playing Video Games

Photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

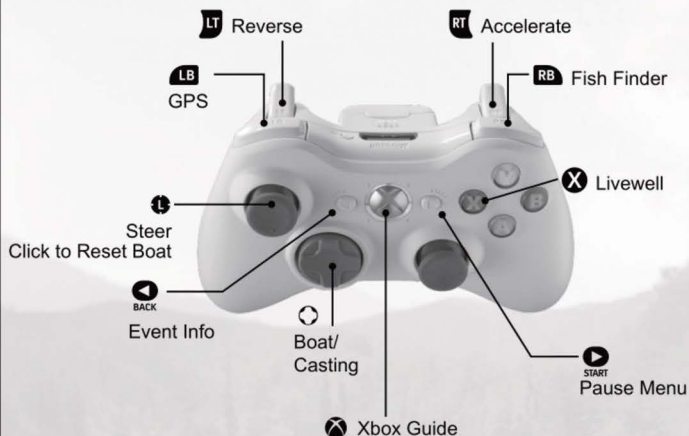

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Xbox LIVE

Play anyone and everyone, anytime, anywhere on Xbox LIVE®. Build your profile (your gamer card). Chat with your friends. Download content at Xbox LIVE Marketplace. Send and receive voice and video messages.

Get connected and join the revolution.

Connecting

Before you can use Xbox LIVE, connect your Xbox 360 console to a high-speed Internet connection and sign up to become an Xbox LIVE member. For more information about connecting, and to determine whether Xbox LIVE is available in your region, go to www.xbox.com/live/countries.

Family Settings

These easy and flexible tools enable parents and caregivers to decide which games young game players can access based on the content rating. For more information, go to www.xbox.com/familysettings.

MENU NAVIGATION

If you want to go straight into gameplay, please use these options:

1. Select **New** from the menu.
2. Choose your character in the character selection screen.
3. Name your character or accept the default name.
4. Save your game or continue without saving.

Game Modes

Tournament Fishing

In this mode, you will participate in 3 different tournaments – Easy, Normal, and Hard. You will have to begin on Easy and work your way up by winning and unlocking additional tournaments.

Open Fishing

This mode allows you to have a free-roaming fishing experience in any (unlocked) fishing area.

Quick Challenge

This mode allows players to jump right into the fishing action by selecting a random (unlocked) fishing area.

Options

This menu allows you to change gameplay, audio and controls settings.

Extras

This menu includes a lot of valuable information:

- Player's statistics
- Angler's Den
- Credits

GAMEPLAY TIPS

Trolling Mode

In this mode, the player can move slowly and quietly around the lake using the trolling engine. This is very useful in finding the perfect fishing spot. Your fish-finder at the bottom right corner of the screen will be of great help to you.

Once you select a spot, use the **D-pad** to switch to the Casting Mode or Boat Mode.

Boat Mode

In Boat Mode, you can take full advantage of the boat's power and drive around the lake at full speed. At the same time, you are still able to use the fish-finder, but at higher speeds it is not as accurate.

Casting Mode

When you begin the game, your character will be standing at the front of the boat, ready to cast. You can change the casting direction using the **Left Stick**.

When you are ready to cast you should know which lure you want to use. This will depend on:

1. The species of fish you are trying to catch (your objective).
2. Depth at which the fish is located (fish-finder).

With this information you can select the right lure from the Fishing Gear menu (**B button**).

Once you cast you will have to pay attention to two things:

1. Line tension. You will have to counter the line tension using the rod (Right Stick) and reel (RT). If you don't manage to reduce the line tension in time you will have to perform a combo to prevent the line from breaking.
2. Combos. These are bonuses that reward you with faster reeling, increased lure attractiveness, etc.

Combos

Attract

When this combo is performed correctly it makes the lure more attractive to fish.

Sure-bite

Perform this combo correctly and the fish is hooked. But if you fail the fish will escape.

Reel-in boost

When performed correctly, the line is pulled in with a short 30% speed boost.

Time warp

If performed successfully, time passes 20% quicker but the fish gets extra energy.

Sure hand

If performed correctly, rod-movement combos (keeping the tension meter centered) are easier for 2 minutes and the fish doesn't fight as much.

Aerial boost

If performed correctly, the fish jumps out of the water and is reeled in quicker.

Old sage

If performed successfully, combo timings are extended by 15% for the rest of the fish fight.

Fish hero

Fish gains extra energy and fish fight takes longer allowing more points to be earned.

LURES

This game features over 30 types of the best Rapala branded lures that vary in color and weight. They will provide you with all you need to be a successful Bass angler.

LOCATIONS

The game features the following popular North American locations:

- Clear Lake (CA)
- Lake Wylie (NC/SC border)
- Lake St. Clair (MI)
- Lake Amistad (TX/Mexico border)
- Lake Logan Martin (AL)
- Lake of the Ozarks (MO)
- Lake Okeechobee (FL)

FISH

Rapala Fishing Frenzy will give you an opportunity to hook the most popular bass species:

- Largemouth Bass
- Smallmouth Bass
- Spotted Bass
- Striped Bass
- White Bass
- Roanoke Bass
- Suwanee Bass
